EXPERIENCE

FRONT END DEVELOPER – BEASTGRIP, CO. | JANUARY 2015 - PRESENT

I'm currently working full-time on the following UI/applications using React.js and Node.js:

- A custom e-commerce platform dashboard for adding/editing page content.
- A product bundler app, that allows customers to input their preferences and get a custom gear recommendation.
- A media page app, that stores video project and product data on our database and displays them on a masonry grid. The customer can click a button to instantly add all products used to their cart.

VOLUNTEER – AUGUST 2016-PRESENT

In my spare time, I contribute to non-profit organizations and open source projects to strengthen my skills and help the community.

Recent projects:

Documentation website for Mail For Good open source project: <http://mail-for-good.netlify.com> - Hugo, JavaScript, GitHub

Australian non-profit film submission website: <http://mina.pro> - WordPress

Local Chicago audio engineering company informational website: <http://millerstreetsudios.com> - WordPress
