EXPERIENCE

OPEN SOURCE CONTRIBUTOR – [MAIL FOR GOOD](#) | NOVEMBER 2017 - PRESENT

- Built a static site with Hugo for the [Mail For Good repository](#) documentation.
- Created a single page design, using [Google's Material Design Standards](#) to enhance readability and accessibility.
- Added modals to the application screenshots for higher resolution images and wrote the pages in Markdown for easier contributions.
- Committed to maintain and add new features to the site as needed on the core team of this repository long-term.

FRONT END DEVELOPER – [BEASTGRIP, CO.](#) | JANUARY 2015 - PRESENT

- Created new partnerships with over 10 different Fortune 500 companies.
- Designed the front end of our new, upcoming e-commerce website with Figma and modern CSS.
- Programmed 3 applications with React.js and Node.js to lower abandoned carts and increase bundle sales and user engagement (currently in beta).
- Styled a [shoppable Instagram app](#) to match our branding and improve bundle sales.

[MOBILE INNOVATION NETWORK AUSTRALASIA](#) – FEBRUARY 2017 - AUGUST 2017

- Created a new WordPress website to increase brand recognition and film submissions.
- Added Facebook, Twitter and LinkedIn feeds to increase user engagement and communication.

[MILLER STREET STUDIOS](#) – AUGUST 2016 - FEBRUARY 2017

- Created a new WordPress website to increase bookings and showcase the music studio's best features.
- Incorporated SoundCloud embeds, a masonry image gallery and Google Maps for improved representation.
